# CASE HISTORY

## Preservation of Seawater Pump System

### DATE

January 2022

### CORTEC® REPRESENTATIVE

Metchem Corrosion Specialties Inc.

### CUSTOMER

Memorial University of Newfoundland – Marine Institute

### LOCATION

Holyrood, NL, Canada

### PRODUCT

EcoAir® 337

### PROBLEM

The customer was looking for a product and recommendations to preserve a pump system that would temporarily be put into storage. This equipment includes a 100 gallon (379 L) tank that is periodically used in the ocean to pump bubble-infused seawater. The system needed to be taken out of service and protected for several months.

### APPLICATION

The pump and tank were flushed out to remove any saltwater that was inside. Then the equipment was fogged with Cortec® EcoAir® 337 and capped off.

### CONCLUSION

This piece of equipment is now in storage and protected from potential rust and corrosion until the equipment needs to be put back in the field again.
