

MICRO-CORROSION INHIBITING COATINGS POWERED BY NANO VPCI®

# CASE HISTORY

## OCTG (Oil Country Tubular Goods) Inspection and Preservation Services

Coating with VpCI®-389 when wet

Tubular when dry

### DATE

February 2016-February 2020

### CUSTOMER

Oil and Gas Major

### CORTEC® REPRESENTATIVE

PT Tiga Ombak

### LOCATION

Indonesia

### PRODUCTS

VpCI®-389

VpCI®-416

### PROBLEM

The customer required preservation of pipe tubulars that needed to stay corrosion-free during long-term storage until they could be run into oil wells.

### APPLICATION

All tubulars of 30" (76.2 cm) were water-blasted inside and outside with VpCI®-416 to clean and degrease the entire pipe and thread areas. VpCI®-389 was applied to coat the outsides of the tubulars. Threading compound was used on the pipe threads.

### CONCLUSION

Cortec's representative was contracted to perform the work for four years, and the client was extremely happy with the solution.
