## HIGH PERFORMANCE VpCI® PACKAGING

# CASE HISTORY

## Protecting New High Voltage SRC Units Until Commissioning

**CORTEC® REPRESENTATIVE**  
Cratex Industrial Packing

**PRODUCT**  
VpCI®-126  
ElectriCorr® VpCI®-239

### PROBLEM

The customer had a set of new high voltage Secondary Resistance Controllers that needed to be shipped to a mine in southern Asia. The equipment required long-term corrosion protection for a minimum of six months until being installed at the site.

### APPLICATION

Cratex sprayed ElectriCorr® VpCI®-239 inside the unit and wrapped it in VpCI®-126 film before packing it in a custom crate to ship overseas.

### CONCLUSION

Taking this simple precaution allows Synergy to have peace of mind about keeping the equipment in like-new condition until the customer is ready to use it. It also helps Synergy to foster a good company image and positive relationship with customers in spite of unpredictable and uncontrollable environmental conditions after shipment.

### DATE

January 2020

### CUSTOMER

Synergy Engineering Ltd.
